

What if health researchers are actually wrong?

Global Health Inspiration Day

Oliver Mutanga

25th September 2018

Global Health Challenges

- ❑ Emergence & re-emergence of infectious diseases
- ❑ Patients & diseases
- ❑ Powers that shape the global health system

How to deal with the rich people & powerful institutions?

1. Fund & donate to research-get support for their causes
2. Set the agenda for decision making- 'sound evidence'
3. Influence public opinion-control information and arguments raised

Pay attention to the immediate environment

The end

THANK YOU
