

Table 4.9 Results of fitting a linear regression model of BWT on RACE, SMOKE, and HT, $n = 189$.

| Variable | Estimate | SE | <i>t</i> | P | 95% CI |
|----------|----------|------|----------|---------|--------------|
| RACE | | | | < 0.001 | |
| RACE2 | -426 | 153 | -2.79 | 0.006 | (-727, -125) |
| RACE3 | -450 | 116 | -3.89 | < 0.001 | (-678, -222) |
| SMOKE | -423 | 108 | -3.91 | < 0.001 | (-637, -210) |
| HT | -383 | 205 | -1.87 | 0.063 | (-787, 20.6) |
| Constant | 3353 | 91.6 | 36.6 | < 0.001 | (3172, 3534) |
