Basic factors for local risk assessment in ECO-online		Edition: 2 (1-18.05.16)
		Pages : 1 Filing number in ePhorte: 2016/7560
Elaborated: NCMM Administrators in ECO-online	Approved: Centre Director Kjetil Taskén	Dato: 22.05.2016 14.02.17

The administrators in ECO-online need to do a local risk assessment concerning the use of the chemicals which we have in the chemical archiving system. They therefore need information concerning the use of chemicals causing a health hazard. The person who wants to order a chemical for a project has to answer the question below:

Product:

Supplier:

Article number:

Solid weight:

Solution volume:

Hazard statements for the chemical.

The use of chemical:

Where is the chemical used? Hood: Bench: Other (explain):

Approximately how much:

Diluting: Yes:

No:

Highest conc:

Working solution:

Other information:

Frequency of use:

Daily:

Weekly:

Monthly:

Annually:

Period: For how long:

Exposure:

Are you exposed to the chemical when in use? Yes: How: No:

If yes, can you work differently to avoid exposure?

Substitution:

Is a less dangerous chemical possible to use? Yes: No:

If no, explain why.

If yes, what is the name of the replacement?

Risk assessment done by:

Date:
