

Report LAMU NCMM 1- 2019, 26.03.19 at 13.00- 14.30

Present: Janna Saarela, Ingrid Kjelsvik, Anthony Mathelier, Gladys Tjørhom, Bojana Sredic and Liv Bjørland.

Room: Micro at E2

Item 1-1/19 Minutes from meeting 29.11.18 were approved.

Item 2-1/19 Short briefings

- Oxygen detectors are ordered: Four for low oxygen levels when filling the LN2 tanks. One for higher levels due to use of pure oxygen.
- The Security Operation Center (Day and Night Service) still has the EMERGENCY number 22856666. Telephone 2855007 is for contacting them for other NON emergency matters, for instance if you are locked inside.
- Responsible for dosimeters is Gladys Tjørhom
- Updating of phones. The phones need updating every 6 months if not in use. Which routines shall we introduce to bypass that problem in an emergency?

Item 3-1/19 Detectors for isotopes. NCMM can buy new Geiger- Muller detectors for P-32

Item 4-1/19 Documentation of HSE-questions. LAMU went through the proposal of Quiz questions. LAMU recommended a multiple-choice alternative instead of a questionnaire with written replies.

Item 5-1/19 NCMM has closed all earlier adverse events. There has been one new incident: due to spill from a culture flask dropping to the floor. It was taken care of immediately, and the area was disinfected.

Item 6-1/19 The 2nd LAMU-meeting 2019 decided to the 4th of June 2019. Ingrid sent the invitation to all at the end of the meeting.

Item 7-1/19 Miscellaneous: None
