

## Vedlegg 1: Oppgaver og vilkår for teknisk bakvakt (TB)

### Availability:

TB can be called by phone 24/7 every day. If TB cannot answer immediately, he is not obliged to do so. It is expected that TB will call back as soon as possible.

### Purposes:

1. Receive reports from people working or on watch during weekends, holidays and non-working hours. These reports have to be related to technical issues such as equipment failure, water or electric supply, light cycles, humidity and temperature inside animal rooms, ventilation problems, risk of contamination for our animals, etc.
2. Assess the received information and decide if the health of our animals is at risk due to technical problems that may be solved.
3. Advice, if possible, the caller about how to solve the problem, or at least how to alleviate it.
4. If it is agreed that the caller cannot solve the problem, TB will have to come to KPM to assist. In this case, TB will have to write overtime.
5. Receive reports from VAKTSENTRALEN. These reports are related to the fire alarm, the gas sensor alarm, or the security alarm.
6. Evaluate the report and advice VAKSENTRALEN and, if deemed necessary, come to KPM to assist.
