**Center Affiliations:**

2003-2011

**Director**, Mary Amelia Douglas-Whited Community Women's  
Health Education Center, Tulane University Health Science  
Center,  
New Orleans, LA, U.S.

In 2000, the Frost Foundation granted Tulane University National Center of Excellence in Women's Health unrestricted funding to assist in continuing the work in their Women's Health Projects. In January 2003, the Frost Foundation pledged \$5 million to name the Mary Amelia Douglas-Whited Community Women's Health Education Center. The Mary Amelia Center serves as a comprehensive, community-oriented health education center by providing health education programs that are culturally, geographically, and age appropriate. With an ecological approach to health promotion focuses on sharing, building and empowering, the center recognize that providing health information is only a small part of fostering healthy individuals and communities.

2002-2005

**Medical Director**, Tulane Total Women's Health Care Center, Tulane University Health Sciences Center, New Orleans, LA, U.S.

This center provided comprehensive clinical care to women across the lifespan. This was a multidisciplinary clinic with Nurse Practitioners, Medical Doctors and Social Workers practicing in the clinic. Family medicine, general internal medicine, obstetrics and gynecology, rheumatology, hematology, endocrinology, reproductive endocrinology and infertility as well as psychiatry were represented. 65% of our patients were African American. We had an active bone health program as well as several health education programs in the clinic that was closed due to Hurricane Katrina flooding our clinic with four feet of water.

1999-2011

**Director**, Tulane Xavier National Center of Excellence in Women's Health, Tulane University Health Science Center, New Orleans, LA, U.S.

The Tulane Xavier National Center of Excellence in Women's Health (TUXCOE) was designated as a National Center of Excellence by the U.S. Office of Women's Health, Department of Health and Human Services in October 1998 with the purpose to *"support innovative national model program projects for comprehensive and coordinated women's health care, public and health care professional education, and research."* The Center is a collaborative effort of Tulane University and Xavier University of Louisiana. The Center has so far raised around \$12 mill in research and program funding from DHHS, CDC, NIH, HRSA, MCHB, the Frost Foundation, Johnson & Johnson, Pharmaceutical companies, and Tulane University.

#### Knowledge to Practice

HRSA T21MC18128-01-00

The primary goal of this program is "focus on increasing the leadership skills of MCH professionals by facilitating the timely transfer of new information, research findings and technology related to MCH; and updating and improving the knowledge and skills of health and related professionals in programs serving mothers and children". We will address these disparities by implementing a multi-faceted training program to enhance local capacity using breastfeeding promotion within hard to reach communities in our geographical region as the lens.

#### Maternal and Child Health Long Term Training Program

2 T76MC04927-05-00

\$1,725,000 HRSA

The primary goal of this Public Health Training Program is "to improve the health status of women, infants, children, youth, and their families by developing MCH professionals exhibiting strong professionalism and cultural competency in public health leadership. The Maternal and Child Health Section at Tulane will work to achieve this overall goal through: 1) Provide MCH leadership and career development training for students, professionals, and faculty; 2) Integrate key principles of PH practice into teaching, research and service; 3) Conduct research and research training; 4) Strengthen partnerships with the community and MCH agencies

#### Prevention of child maltreatment: A focus on social norms and corporal punishment

1K01HD058733-01A1

Taylor (PI)

NIH/NICHD

The research plan includes a meta-analysis designed to assess the effects of prior intervention efforts to change social norms relevant to child maltreatment, a qualitative study to explore issues relevant to informing theory, instrument, and intervention development regarding corporal punishment use and child maltreatment risk, and a community-based survey to explore associations and variations between perceived social norms about corporal punishment, related constructs, and use of corporal punishment.

**Principal Investigator**

Building Interdisciplinary Careers in Women's Health Training Program  
**\$2,500,000 NIH**

The fourth cycle of the program is dedicated to promoting Women's Health research and the subsequent transfer of findings. In order to improve the quality and increase the quantity of Women's Health research Tulane BIRCWH bridge the period between advanced training and research independence, as well as link professions, scientific disciplines, and areas of interest for selected scholars. This ensure, in a thoughtfully mentored setting, the necessary protected time for both didactic learning and research training such that the program will ultimately produce exceedingly competent junior faculty members who will achieve research independence.

**Principal Investigator**

Stress and Depression Awareness Post Hurricane Katrina  
**\$200,000 Johnson & Johnson**

This program is a collaborative effort between Tulane Xavier National Center of Excellence in Women's Health (TUXCOE) and Louisiana Office of Public Health Maternal and Child Health Program. The program aims at increasing awareness of post disaster mental health in the two state areas, which were affected by hurricanes Katrina and Rita.

Mary Amelia Douglas-Whitehead Community Women Health Education Center  
**\$5,000,000 donation from Frost Foundation**

In January 2003, the Frost Foundation pledged \$5 million to name the Mary Amelia Douglas-Whited Community Women's Health Education Center. The Mary Amelia Center serves as a comprehensive, community-oriented health education center by providing health education programs that are culturally, geographically, and age appropriate. With an ecological approach to health promotion focuses on sharing, building and empowering, the center recognize that providing health information is only a small part of fostering healthy individuals and communities.

7/00-9/12

**Principal investigator**

Tulane Maternal and Child Health Epidemiology Program  
**\$231,000 HRSA/MCHB Doctoral Support Training Program**

The primary goal of this program is to educate doctoral candidates to be competent in maternal and child health (MCH) and in the application of epidemiologic methods to conduct research in the field. Additionally, the program aims to foster the capacity of local and state agencies in MCH epidemiology.

Maternal and Child Public Health Leadership Training grant  
**\$1,900,528 HRSA MCHB**

The primary goal of this Public Health Training Program is "to improve the health status of women (including women of reproductive age), infants, children, youth, and their families" by supporting training of public health professionals for leadership in Maternal and Child Health in accredited Schools of Public Health. The Maternal and Child Health Section at Tulane work to achieve this overall goal through: 1) leadership training for public health practitioners, 2) degree-related MCH leadership and management training for master's and doctoral students, 3) expanded research and research training within the MCH section, and 4) strengthened partnerships with the community and with public health agencies.

Building Interdisciplinary Careers in Women's Health Training Program  
**\$2,300,000 NIH**

The Tulane BIRCWH bridged the period between advanced training and research independence in a mentored setting. In this program, *9 of 11 BIRCWH Scholars were females, and include one African American and three Asian Scholars*. During our first four years we successfully supported 11 (4 current) very junior faculty members, comprising 1MD, 5MD MPH/MSc, 1MD PhD, 3PhD, 1PhD MPH. The research undertaken spanned from translational, to patient-oriented to epidemiological and health services outcomes research. This exemplary group of junior faculty had since entering the program collectively, *published (or in press) 95 peer reviewed papers and presented 72 abstracts at national and international conferences* by 2007, and was on track for developing independent research careers. The majority of the first cohort is now funded as PI's or Co-PI's on NIH grants.
